### **DETAILED ACTION**

1. Regarding the double patenting rejection as in the previous action, it is now withdrawn based on applicant's submitted a Terminal Disclaimer file on 07-09-2007 and 11-20-2007.

### ***Allowable Subject Matter***

2. Claims 1-5 are allowed.

### ***Reasons for allowance***

The following is an examiner's statement of reasons for allowance: Regarding independent claims 1 and 5, Shpak (U.S. 6907229) teaches a transmitting the first downlink signal includes arbitrating among the access points so as to select the first access point to transmit the first downlink signal. Most preferably, arbitrating among the access points includes sending broadcast messages from the access points receiving the first uplink signal, and selecting the first access point responsive to the broadcast messages (col. 4, lines 10-16). However, Shpak alone or in combination with other prior art of record fail to disclose, an access point in a wireless communications environment including multiple access points and stations, wherein stations gain network access by associating with one or more of the access points, with a logic for collecting bid messages from stations, each bid message including a parameter related to the distance between the access point and the station; logic for sending an accept message to one of the stations from which a bid message was received, the accept message for causing the station to associate with the access point, as specified in independent claims 1 and 5.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
